Acceptable Use Policy

Rules for lawful, safe, rights-respecting, and non-abusive use of Perceptron Services

Last updated: May 16, 2026

This Acceptable Use Policy ("AUP") governs use of Perceptron, Auta, perceptronai.org, Perceptron APIs, and related services (collectively, the "Services"). It applies to all users, customers, administrators, developers, collaborators, contractors, and anyone who accesses the Services through an account, workspace, API key, integration, or export.

This AUP is incorporated into our Terms and Conditions. Violation of this AUP may result in suspension, termination, content removal, export restrictions, rate limiting, legal action, or other measures.

1. General Responsibilities

You are responsible for all activity under your account, workspace, credentials, API keys, integrations, prompts, dataset requests, exports, and downstream uses.

You must use the Services only in compliance with applicable law, the Terms and Conditions, the Privacy Policy, the Copyright/DMCA Policy, this AUP, documentation, written agreements, source terms, dataset licenses, and third-party rights.

You are solely responsible for the legality, rights-clearance, quality, accuracy, privacy compliance, safety, and downstream use of Customer Content, Public Source Content requested by you, Output, Datasets, exports, trained models, and deployments.

2. Prohibited Illegal, Infringing, or Rights-Violating Uses

You may not use the Services to create, request, upload, source, process, annotate, export, distribute, train on, publish, commercialize, or deploy content or datasets that:

- violate any law, regulation, court order, sanctions rule, export control, contract, license, privacy policy, source term, or third-party restriction;
- infringe, misappropriate, or violate copyrights, trademarks, trade secrets, privacy rights, publicity rights, database rights, contractual rights, confidentiality obligations, or other rights;
- include content you do not own or have permission to use, unless your use is independently lawful and you accept all related risk;
- remove, alter, obscure, or falsify copyright notices, attribution, license notices, source metadata, provenance information, or rights-management information;
- bypass paywalls, login requirements, access controls, technical protection measures, robots restrictions, rate limits, API terms, or source-owner restrictions;
- re-upload, re-source, re-request, or redistribute material that has been removed, blocked, or disabled due to a legal, copyright, privacy, source-owner, or safety request.

3. Public Internet Dataset Sourcing Rules

When using Auta or related tools to source public internet imagery or other Public Source Content, you must:

- provide lawful and accurate prompts, instructions, filters, and dataset goals;

- avoid requesting content from sources or categories where you know or reasonably should know that collection, processing, training, publication, or redistribution is restricted;
- review source URLs, license signals, attribution requirements, terms of use, privacy implications, and rights-clearance needs before using or distributing datasets;
- not represent that a dataset is rights-cleared, privacy-cleared, commercially licensed, or production-ready unless you have independently verified that claim;
- promptly comply with takedown, deletion, source opt-out, or rights-holder instructions that apply to datasets or exports in your possession or control.

Perceptron may block domains, sources, topics, prompts, datasets, projects, exports, or outputs that present legal, safety, rights, privacy, security, operational, or reputational risk.

4. Prohibited Privacy, Biometric, and Surveillance Uses

You may not use the Services to identify, track, profile, monitor, target, or make decisions about individuals without a valid lawful basis and all required notices, consents, agreements, and safeguards.

You may not use the Services for face recognition, biometric identification, biometric verification, emotion recognition, demographic inference, sensitive-trait inference, persistent tracking, mass surveillance, doxxing, stalking, or location tracking unless expressly authorized in writing by Perceptron and lawful in all applicable jurisdictions.

You may not create, request, upload, source, annotate, or export datasets focused on children, private individuals, homes, schools, hospitals, places of worship, protests, medical settings, license plates, identity documents, or other sensitive contexts unless you have a lawful basis and Perceptron has approved the use where required.

You may not upload or process protected health information, payment card data, government identifiers, biometric templates, precise location data, children's data, or other highly regulated data unless Perceptron has expressly agreed in writing and required safeguards are in place.

5. Prohibited Harmful, Abusive, or Unsafe Content

You may not use the Services to create, request, upload, source, process, annotate, export, distribute, train on, or deploy content that:

- promotes violence, terrorism, extremist activity, criminal activity, exploitation, abuse, harassment, hate, threats, or dehumanization;
- contains child sexual abuse material, sexual exploitation, non-consensual intimate imagery, sexualized minors, or attempts to create, classify, detect, or source such material except for lawful, authorized safety reporting by qualified entities;
- facilitates self-harm, suicide, eating disorders, or physical harm;
- facilitates weapons development, evasion, targeting, or physical harm;
- creates malware, phishing, credential theft, spam, botnets, denial-of-service activity, vulnerability exploitation, or unauthorized access;
- facilitates fraud, scams, impersonation, identity theft, deceptive synthetic media, unlawful surveillance, or manipulation;
- is defamatory, obscene, invasive, exploitative, or otherwise harmful in a way that creates risk to Perceptron, users, third parties, or the public.

6. High-Risk and Regulated Uses

You may not use the Services, Output, Datasets, or exports as the sole basis for decisions that affect legal rights, safety, employment, housing, credit, education, healthcare, insurance, immigration, criminal justice, eligibility for essential services, or other high-impact matters.

You may not deploy Output or Datasets in safety-critical systems, autonomous vehicles, robotics control, industrial control, medical devices, law enforcement, military, national security, aviation, weapons systems, or other high-risk environments without independent validation, required approvals, professional oversight, and a separate written agreement with Perceptron where required.

You are responsible for human review, testing, validation, bias assessment, error analysis, documentation, monitoring, and compliance before using any Output, Dataset, model, or export in production.

7. Security, Abuse, and Platform Integrity

You may not:

- interfere with, disrupt, overload, disable, damage, or impair the Services or third-party systems;
- breach, circumvent, probe, scan, or test security or authentication measures without written authorization;
- share, expose, sell, lease, sublicense, or misuse API keys, tokens, credentials, or access privileges;
- use unauthorized bots, scrapers, crawlers, spiders, offline readers, or automated tools to access the Services or collect content from the Services;
- reverse engineer, decompile, disassemble, copy, modify, extract, or attempt to derive source code, model weights, system prompts, hidden prompts, internal data, model architecture, or non-public information except as permitted by law;
- attempt model extraction, prompt extraction, membership inference, automated benchmark abuse, rate-limit evasion, account sharing, account farming, or usage-limit circumvention;
- use the Services to build, train, benchmark, or improve a competing product or service except as expressly permitted by a written agreement;
- submit malicious code, corrupted files, destructive payloads, or content designed to interfere with systems or data.

8. Commercialization, Redistribution, and Attribution

You may not sell, sublicense, publish, distribute, commercialize, or make publicly available Datasets, Public Source Content, Output, or exports unless you have all required rights, licenses, permissions, attributions, and lawful bases.

You must preserve copyright notices, license notices, attribution, source URLs, provenance metadata, and use restrictions where required by law, license, source terms, or Perceptron documentation.

You may not misrepresent the origin, rights status, accuracy, completeness, safety, privacy status, or legal status of any Dataset, Output, export, or model.

9. Monitoring and Enforcement

Perceptron may monitor, log, review, investigate, preserve, remove, disable, filter, restrict, or disclose information where we believe it is necessary or appropriate to operate the Services, enforce policies, prevent abuse, respond to legal requests, protect rights or safety, or reduce legal, security, operational, or reputational risk.

We may suspend, terminate, throttle, block, or restrict accounts, workspaces, API keys, projects, datasets, sources, exports, features, or access without notice where we believe a violation or risk has occurred.

We may report suspected illegal activity to law enforcement, regulators, rights holders, source websites, service providers, affected users, or other appropriate parties.

Perceptron has no obligation to monitor all content and assumes no responsibility for Customer Content, Public Source Content, Output, Datasets, exports, or downstream use. Enforcement decisions are at our discretion and do not create any duty or waiver.

10. Reporting Violations

To report suspected abuse, policy violations, security issues, illegal content, rights violations, or unsafe use, contact support@perceptronai.org.

Suggested subject lines: "AUP Report," "Security Report," "Rights Complaint," "Public Source Opt-Out," or "Illegal Content Report."

Please include enough information for us to investigate, such as account identifiers, workspace IDs, dataset IDs, source URLs, screenshots, API request IDs, timestamps, and a description of the concern.

11. Changes to This AUP

We may update this AUP from time to time. Updated versions will be posted with a revised "Last updated" date. Updates may take effect immediately where required for legal, security, safety, or operational reasons.

Your continued use of the Services after an updated AUP becomes effective means you agree to the updated AUP.
