Privacy Policy

For perceptronai.org, Auta, Perceptron APIs, and related services

Last updated: May 16, 2026

This Privacy Policy explains how Perceptron AI Labs Inc. ("Perceptron," "we," "our," or "us") collects, uses, discloses, retains, and protects information when you access or use Perceptron, Auta, perceptronai.org, Perceptron APIs, and related services (collectively, the "Services").

By using the Services, you acknowledge this Privacy Policy. If you use the Services on behalf of a company, organization, or other legal entity, you represent that you are authorized to provide information to us and to cause that entity to be bound by this Privacy Policy and our Terms and Conditions.

This Privacy Policy is designed for an AI dataset creation and annotation platform. The Services may process uploaded images, videos, prompts, URLs, annotations, metadata, generated outputs, usage logs, and publicly available internet content requested through Auta or related tools.

1. Scope

This Privacy Policy applies to information we collect through our websites, applications, APIs, demos, documentation, beta features, support channels, events, sales communications, and any service that links to this Privacy Policy.

This Privacy Policy does not apply to third-party websites, third-party datasets, third-party models, third-party integrations, or services that we do not control. Those third parties may have their own privacy policies, licenses, and terms.

This Privacy Policy is incorporated into our Terms and Conditions. Capitalized terms not defined here have the meanings given in the Terms and Conditions.

2. Roles: Controller, Processor, and Service Provider

For account information, website analytics, billing information, marketing information, security logs, product telemetry, and other business information, Perceptron generally acts as a controller or business under applicable privacy laws.

For non-public Customer Content that you upload into a workspace under a written enterprise agreement or Data Processing Addendum, Perceptron may act as a processor or service provider, processing that data on your behalf and under your instructions.

Unless a separate written agreement expressly states otherwise, Perceptron may process Customer Content, Public Source Content, Output, logs, and derived information as described in this Privacy Policy and the Terms, including for service operation, security, abuse prevention, analytics, research, development, testing, training, and improvement of Perceptron Technology.

You are responsible for determining whether your use of the Services makes you a controller, business, processor, service provider, joint controller, or other regulated party, and for satisfying your own privacy, notice, consent, and data-processing obligations.

3. Information We Collect

We may collect the categories of information below, depending on how you use the Services:

- Account and profile information, such as name, email address, organization name, role, login credentials, authentication information, and user preferences.
- Commercial and billing information, such as plan information, invoices, payment status, billing address, purchase history, and payment processor references. We may use third-party payment processors and do not intentionally store full payment card numbers unless expressly stated.
- Customer Content, including images, videos, zip files, URLs, prompts, instructions, annotation schemas, labels, masks, bounding boxes, polygons, OCR results, captions, notes, metadata, datasets, exports, and other materials you or your authorized users provide.
- Public Source Content, including public images, videos, webpages, captions, URLs, license signals, source metadata, thumbnails, and related materials that the Services identify, retrieve, cache, process, annotate, transform, or export in response to your dataset requests or our service operations.
- Output, including annotations, labels, structured data, masks, bounding boxes, generated metadata, model responses, derived features, dataset organization, evaluations, and exports generated by or through the Services.
- Usage and device information, such as IP address, browser type, device identifiers, operating system, pages viewed, referring URLs, API calls, latency, errors, feature usage, model/version identifiers, token or compute usage, timestamps, and diagnostic logs.
- Communications, including support requests, sales inquiries, demo requests, feedback, survey responses, messages, and recordings or transcripts where disclosed.
- Integration information, such as files, metadata, permissions, access tokens, repository references, cloud-storage references, and other information you choose to connect to the Services.
- Cookies and similar technologies, including analytics identifiers, session cookies, local storage, pixels, and related tracking technologies used to operate, secure, measure, and improve the Services.
- Information from third parties, such as authentication providers, analytics providers, enrichment providers, public sources, event partners, affiliates, service providers, and other users in your workspace.

4. Public Internet Dataset Sourcing

Auta and related Services may allow you to describe a dataset and request that the Services source imagery or other materials from publicly available internet locations or third-party repositories.

When this feature is used, we may collect and process Public Source Content, source URLs, crawl or retrieval metadata, license signals, file metadata, deduplication fingerprints, embedding vectors, annotations, quality scores, and other technical information needed to create, evaluate, organize, filter, annotate, and export datasets.

Public availability does not mean that content is free of copyright, privacy, publicity, contractual, license, or other restrictions. We do not represent that Public Source Content is rights-cleared, accurate, current, safe, lawful for your intended use, or suitable for model training, commercial use, publication, or redistribution.

You are responsible for reviewing Public Source Content, source terms, licenses, attribution requirements, privacy implications, rights-clearance needs, and downstream use restrictions before using, training on, distributing, publishing, or commercializing any dataset or Output.

We may remove, block, de-index, filter, quarantine, or stop using Public Source Content or source domains at our discretion or in response to rights-holder requests, privacy requests, source restrictions, law, abuse reports, or our internal policies.

5. How We Use Information

We may use information for the following purposes:

- To provide, operate, maintain, secure, troubleshoot, and support the Services.
- To create, process, annotate, transform, organize, validate, deduplicate, export, and manage datasets.
- To respond to prompts, instructions, API calls, support requests, sales inquiries, and administrative communications.
- To personalize features, remember preferences, manage accounts, authenticate users, and enable collaboration in workspaces.
- To monitor performance, reliability, errors, latency, capacity, quality, abuse, fraud, security incidents, and policy violations.
- To develop, test, train, fine-tune, evaluate, benchmark, debug, and improve Perceptron Technology, including AI models, data pipelines, annotation systems, dataset sourcing systems, ranking systems, filters, safety systems, and product features.
- To create and use aggregated, anonymized, de-identified, statistical, or derived information for any lawful business purpose, including analytics, benchmarking, model evaluation, research, and service improvement.
- To enforce our Terms, this Privacy Policy, the Acceptable Use Policy, the Copyright/DMCA Policy, and other agreements.
- To comply with law, legal process, sanctions, export controls, court orders, regulatory requests, and lawful government requests.
- To protect the rights, property, safety, security, and integrity of Perceptron, users, rights holders, source websites, the public, and third parties.
- To send service notices, security alerts, administrative messages, marketing communications, newsletters, product updates, and event information where permitted by law.
- To evaluate or complete a merger, acquisition, financing, reorganization, bankruptcy, sale of assets, or similar corporate transaction.

6. Broad Service Improvement, AI Training, and Research Rights

Subject to applicable law and any separate written agreement signed by Perceptron, we may use Customer Content, Public Source Content, Output, prompts, instructions, annotations, metadata, logs, feedback, interactions, and derived information to develop, train, fine-tune, test, evaluate, benchmark, monitor, debug, protect, and improve Perceptron Technology and related services.

This may include using information to improve dataset sourcing, object detection, segmentation, tracking, labeling, OCR, captioning, ranking, deduplication, filtering, quality assurance, safety, rights-management workflows, and other AI or data-processing systems.

We may retain and use generalized learnings, model weights, embeddings, statistics, error patterns, quality metrics, evaluations, safety signals, usage patterns, and other derived or de-identified information, even after specific Customer Content is deleted, to the extent permitted by law and our agreements.

Unless a separate written agreement states otherwise, you should not provide sensitive, regulated, confidential, proprietary, or restricted information to the Services if you do not want it processed for the purposes described in this Privacy Policy.

Perceptron does not claim ownership of your Customer Content solely because we process it. However, you grant us the rights necessary to process it as described in this Privacy Policy, the Terms, and any applicable agreement.

7. Cookies and Similar Technologies

We may use cookies, pixels, local storage, SDKs, analytics tools, and similar technologies to operate the Services, maintain sessions, remember preferences, secure accounts, measure performance, understand usage, improve features, prevent abuse, and support marketing.

You may be able to control cookies through browser settings, device settings, or cookie banners where available. Blocking cookies may affect Service functionality.

Some analytics or advertising technologies may be considered a "sale," "sharing," or "targeted advertising" under certain privacy laws. Where required, we will provide legally required choices.

8. How We Disclose Information

We may disclose information in the following circumstances:

- To service providers, subprocessors, contractors, consultants, cloud providers, hosting providers, security providers, analytics providers, payment processors, customer support tools, AI/model providers, and other vendors who process information for us or help operate the Services.
- To affiliates and corporate group companies for business, operational, security, support, analytics, and improvement purposes.
- To workspace owners, administrators, collaborators, team members, and authorized users according to workspace settings and permissions.
- To third-party integrations, platforms, storage providers, repositories, APIs, or applications that you connect to or instruct us to use.
- To rights holders, complainants, users, affected parties, or legal representatives when we process copyright, privacy, safety, abuse, or legal requests, including forwarding notices and counter-notices where appropriate.
- To law enforcement, regulators, courts, public authorities, or other third parties where we believe disclosure is required or appropriate to comply with law, enforce agreements, protect rights, prevent harm, or respond to legal process.
- In connection with a merger, acquisition, financing, reorganization, bankruptcy, due diligence, sale of assets, or similar transaction.
- With your consent or at your direction.
- As aggregated, anonymized, de-identified, statistical, or derived information that does not reasonably identify you, for any lawful business purpose.

9. Sensitive and Regulated Information

The Services are not intended for processing protected health information, payment card data, government identification numbers, biometric templates, children's data, precise location data, sensitive personal information, or other highly regulated information unless Perceptron has expressly agreed in writing and appropriate safeguards are in place.

You must not upload, request, source, process, annotate, or export sensitive or regulated information unless you have all necessary rights, notices, consents, lawful bases, contracts, and safeguards.

If you use the Services with personal data depicting people in images or videos, including faces, bodies, biometric characteristics, homes, license plates, or other identifiers, you are responsible for assessing privacy, biometric, publicity, data-protection, consent, notice, and retention obligations.

10. Children

The Services are not directed to children under 13, and we do not knowingly collect personal information from children under 13. If you believe a child has provided personal information to us, contact us so we can take appropriate action.

You may not request, create, upload, source, annotate, or export datasets focused on minors, schools, childcare settings, or children's faces or bodies unless you have a lawful basis, required consents, and a separate written agreement with Perceptron where required.

11. Security

We use reasonable administrative, technical, and organizational measures designed to protect information. These measures may include access controls, encryption in transit, logging, monitoring, vendor review, and security procedures.

No system, transmission, storage method, model, or dataset pipeline is completely secure. To the fullest extent permitted by law, we do not guarantee that information will be secure, error-free, available, recoverable, or protected from unauthorized access, loss, misuse, alteration, or disclosure.

You are responsible for securing your accounts, API keys, credentials, workspaces, exports, datasets, systems, and downstream uses.

12. Retention

We retain information for as long as reasonably necessary for the purposes described in this Privacy Policy, including to provide the Services, maintain accounts, comply with law, resolve disputes, enforce agreements, prevent abuse, maintain security, and improve the Services.

We may retain logs, backups, audit records, billing records, security records, deletion records, provenance records, rights-management records, and legal records for longer periods where necessary.

We may retain aggregated, anonymized, de-identified, statistical, derived, or model-improvement information indefinitely to the extent permitted by law.

Deletion of specific Customer Content may not delete information that has already been exported, downloaded, published, shared, cached, backed up, included in logs, incorporated into user-controlled systems, or used to create de-identified or derived information.

13. International Transfers

We may process and store information in the United States and other countries where Perceptron, affiliates, service providers, or subprocessors operate. These countries may have data-protection laws different from those in your jurisdiction.

Where required, we may rely on contractual, adequacy, consent, legitimate-interest, or other lawful transfer mechanisms.

14. Your Privacy Rights and Choices

Depending on your location, you may have rights to access, correct, delete, export, object to, restrict, or opt out of certain processing of your personal information. You may also have the right to withdraw consent where processing is based on consent.

To submit a request, contact support@perceptronai.org with the subject line "Privacy Request." We may need to verify your identity and authority before responding.

Privacy rights are not absolute. We may deny, limit, or retain information in accordance with applicable law, contracts, legal obligations, security needs, fraud prevention, dispute resolution, and our legitimate business purposes.

15. Legal Bases for Processing

Where laws such as GDPR or UK GDPR apply, we may process personal data based on one or more legal bases, including performance of a contract, legitimate interests, consent, compliance with legal obligations, protection of vital interests, and public interest where applicable.

Our legitimate interests may include providing and improving the Services, securing systems, preventing abuse, conducting analytics, developing AI and dataset technologies, responding to requests, enforcing agreements, and protecting rights and safety.

16. California and Other U.S. State Privacy Notices

We do not sell personal information for money. However, some analytics, advertising, or measurement technologies may be considered a "sale," "sharing," or "targeted advertising" under certain U.S. state privacy laws.

Where required, residents of applicable states may have rights to know, access, delete, correct, opt out of sale or sharing, opt out of targeted advertising, limit certain uses of sensitive personal information, and appeal a denied request.

To exercise rights, contact support@perceptronai.org with the subject line "State Privacy Request."

17. Customer Responsibilities

You are responsible for the legality, rights-clearance, accuracy, quality, privacy compliance, retention, and downstream use of Customer Content, Public Source Content requested by you, Output, and Datasets.

You must provide all notices, obtain all consents, maintain all lawful bases, honor all individual rights, and enter all required contracts before using the Services with personal information or regulated data.

You are responsible for responding to requests from individuals, rights holders, regulators, and other third parties relating to your datasets, model training, publications, deployments, and exports.

18. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. Updated versions will be posted with a revised "Last updated" date. If changes are material, we may provide additional notice where required by law.

Your continued use of the Services after an updated Privacy Policy becomes effective means you acknowledge the updated Privacy Policy.
